

The background of the slide is a vibrant night cityscape, likely New York City, with numerous skyscrapers illuminated by their lights. Overlaid on this is a large, semi-transparent sphere composed of a network of blue dots connected by thin lines, resembling a molecular or neural network structure. The sphere is centered behind the main title. To the right of the sphere, there are stylized, flowing blue lines that suggest movement or data flow.

Four Stages of AI Product Development

Edge Computing

High Performance & Low Power Consumption

- BoxPC, Workstation
- HPC
- AI PC

AI Perception/IoT

Immediacy & Connectivity

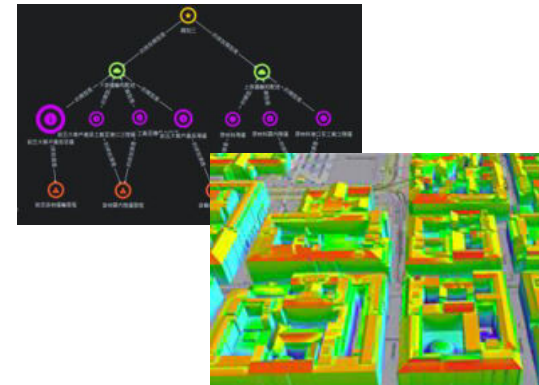

- Industrial IoT Network Security
- Gateway, Sensor, I/O

AI Algorithms/ Tools

Precision

- Supply Chain AI Graphic
- Digital Twins Tech

AI Cloud Application Platform

Flexibility

- Smart City
- Smart Manufacturing
- Smart Building
- Smart Energy Management
- Energy Storage
- Cyber Security
- Device AI Detection

AI Edge

Industrial-grade AI platform

Compact Embedded AI Computing System

AI Workstation

Workstation-grade AI Fanless System

Workstation-grade In-Vehicle AI Computing System

AI Server

For deep learning, machine learning, and inferencing with Dual **intel® XEON®** SP processors and High end GPUS from **NVIDIA**

AI Gateway

Industrial-grade SD-WAN & AI Gateway

AI Chassis

1U/2U AI Server Chassis

Edge Computing/Machine Vision Applications in Robot AI

RESOURCE INTEGRATION

NVIDIA AI Platform + ESaaS + Strategic Partner AI Robot Smart solution

AI PLATFORM

Various development tools, model parameters, algorithms, and accelerated deployment for artificial intelligence robots.

TECHNICAL INTEGRATION

Jetson™

Metropolis

Isaac™

INDUSTRIAL DEVELOPMENT

Provide acceleration and enhancement from simulation to deployment, fostering AI robot intelligence and diversifying applications.
